

SHERATON GRAND

Seattle

Sheraton Grand Seattle **Sustainability** Initiatives

Recycling & Composting

Between recycling and composting we divert at least 70% out of our solid waste stream.

Laundry

Between 68% to 70% of all wash water is recycled. We use environmentally friendly cleaning and washing chemistry.

LED Lighting

All guest rooms and corridors now use LED lighting, and 50% of our overall lighting is converted to LED.

Serve 360

In 2017, Marriott International launched its new sustainability and social impact platform, Serve 360, that includes next-generation goals that will guide our efforts through 2025. Setting concrete, measurable, and transparent goals allows us to align our organization, measure our progress, and hold ourselves, as well as our suppliers, accountable. Some of our hotel's serve 360 initiatives include reducing our water usage by 15%, carbon emissions by 30%, and food waste by 50%.

Sustainable Menus

We aim to integrate leading sustainable and social practices and principles into our core Food & Beverage strategy and operations. We are working to reduce the negative impacts of our business while supporting locally sourced ingredients and their suppliers.

Green Seal 33 Approved

Based on Key Evaluation Categories of waste minimization, energy conservation and management, management of fresh water resources and waste water management, pollution prevention, and environmentally sensitive purchasing.

All Paper Products 80% Post-Consumer Waste
